**SPECIFICATION AMENDMENTS** 

Please amend the specification as follows:

Delete the paragraph beginning on page 191, line 10 through line 19

which states the following:

"Communication media" typically embodies computer readable

instructions, data structures, program modules, or other data in a modulated

data signal, such as carrier wave or other transport mechanism. Communication

media also includes any information delivery media. The term "modulated data

signal" means a signal that has one or more of its characteristics set or changed

in such a manner as to encode information in the signal. By way of example,

and not limitation, communication media includes wired media such as a wired

network or direct-wired connection, and wireless media such as acoustic, RF,

infrared, and other wireless media. Combinations of any of the above are also

included within the scope of computer readable media.
